OUR
TEAM

If you are passionate, have analytical and strategic thinking skills, join us in this exciting journey as we redefine the future of technology and business integration. What we are embarking on is exciting, is sure to shape the future, and leave a lasting impact on the business landscape. We are on a mission to transform the digital landscape by developing an omni channel platform comprising IoT, Data Analytics and Cloud Computing solutions that will push the boundaries of what's possible. We embrace the latest technologies and methodologies to create a robust, highly scalable, and user-friendly platform, that will meet the unique needs of various stakeholders.

At our company, we understand that the key to our success lies in the talent and expertise of our team. We foster a collaborative and inclusive environment where creativity and innovation thrive. We believe in empowering our employees and providing them with resources and support they need to excel in their roles. You will have access to state-of-the-art tools and technologies, professional development opportunities, and a supportive team that values your contributions. You will also gain regional exposure and experience, first in the ASEAN region.

As a member of a forwarding thinking team, you will have the opportunity to collaborate with industry professionals, both local and overseas, to work on a ground-breaking project. We also seek to build partnerships with more technology vendors, to create an ecosystem that will offer a wide range of complementing solutions and services to our stakeholders.

To apply for the positions, please submit your resume, cover letter, and any relevant work samples or case studies that will demonstrate your abilities. We can't wait to hear from you and embark on this incredible journey together.

WE'RE
HIRING

BUSINESS ANALYST

Role Overview

In this role, you will have the opportunity to work on exciting projects, be responsible for analysing processes and data, conduct in-depth research, gather, and document requirements, perform feasibility studies, provide valuable insights to shape project scope and priorities. Your analytical mindset and business acumen will be instrumental in identifying opportunities for optimization, mitigating risks, and driving innovation throughout the project life cycle. You will also be responsible for developing and implementing product strategies and collaborating with cross-functional teams to drive the development of new products and services. You will work closely with development teams to translate complex requirements into intuitive interfaces that will deliver exceptional user experience.

Key Responsibilities

- Conduct research and analysis on industry trends, customer needs, and market opportunities to identify product development opportunities and inform product strategy.
- Work with stakeholders to define and prioritize product requirements, including feature sets, user experience, and technical specifications.
- Collaborate with cross-functional teams, including development, design, and marketing, to develop and launch new products on time and within budget.
- Conduct user research to gain insights into user behavior and preferences and use this information to inform product design decisions.
- Work with Product Specialist to develop and maintain product roadmaps and release plans, ensuring that product development aligns with business objectives and priorities.
- Monitor product performance and customer feedback, making data-driven decisions to improve product performance and customer satisfaction.
- Work with project managers to ensure that product development is completed on schedule and within budget.
- Develop and maintain product documentation, including user guides, product specifications, and release notes.
