

# OUR TEAM

If you are passionate, have analytical and strategic thinking skills, join us in this exciting journey as we redefine the future of technology and business integration. What we are embarking on is exciting, is sure to shape the future, and leave a lasting impact on the business landscape. We are on a mission to transform the digital landscape by developing an omni channel platform comprising IoT, Data Analytics and Cloud Computing solutions that will push the boundaries of what's possible. We embrace the latest technologies and methodologies to create a robust, highly scalable, and user-friendly platform, that will meet the unique needs of various stakeholders.

At our company, we understand that the key to our success lies in the talent and expertise of our team. We foster a collaborative and inclusive environment where creativity and innovation thrive. We believe in empowering our employees and providing them with resources and support they need to excel in their roles. You will have access to state-of-the-art tools and technologies, professional development opportunities, and a supportive team that values your contributions. You will also gain regional exposure and experience, first in the ASEAN region.

As a member of a forwarding thinking team, you will have the opportunity to collaborate with industry professionals, both local and overseas, to work on a ground-breaking project. We also seek to build partnerships with more technology vendors, to create an ecosystem that will offer a wide range of complementing solutions and services to our stakeholders.

To apply for the positions, please submit your resume, cover letter, and any relevant work samples or case studies that will demonstrate your abilities. We can't wait to hear from you and embark on this incredible journey together.

# WE'RE HIRING

## SOFTWARE ARCHITECT

### Role Overview

If you have a passion for designing scalable and resilient software architectures, our Software Architect position is the perfect fit for you. You will play a crucial role in defining the overall system structure, making strategic technology choices, and ensuring our solutions are built to withstand the demands of a rapidly evolving digital landscape. You will need to engage the various stakeholders including target customers, understand their requirements (both technical and non-technical) and translate them into technical solutions for the development and cross functional teams. Candidate is expected to be a good leader and communicator, a good problem solver to address technical challenges and resolve complex issues. You will be assisting the CTO in creating comprehensive solutions and guiding a team of software engineers.

## Key Responsibilities

- Collaborating with various stakeholders to determine software requirements.
- Creating high-level product specifications and design documents.
- Providing the development team with architectural blueprints to follow.
- Guiding and assisting the development team throughout the process.
- Troubleshooting and resolving issues with coding or design.
- Ensuring that you and the team adhere to development schedules and deadlines.
- Presenting regular progress reports and setting goals.
- Testing the final product to ensure it is completely functional and meets requirements.
- Updating software solutions as required.
- Documenting and sharing best practice knowledge for new solutions
- Perform design, debugging, and performance analysis on solutions.

## Qualifications

- Bachelor's Degree, Post Graduate Diploma, Professional Degree
- Minimum of 5 years of demonstrated experience with Indexing/Search Technologies and web-based, object-oriented, data management, and scripting languages
- Minimum of 5 years of demonstrated software development experience working with Open Source

### Career Level

Senior Executive /  
Manager

### Years of Experience

5 years

### Job Type

Full-Time

### Job Specializations

Computer/Information  
Technology, IT-Software

### Employment Value Proposition (EVP)

Be part of the  
pioneering team poised  
for rapid regional  
expansion for an  
innovation driven  
project

## Skills and Competencies

- A bachelor's or master's degree in computer science, IT, software engineering, or computer science.
- Extensive experience in software development and project management.
- Solid understanding of a variety of programming tools and development platforms.
- Excellent organizational and leadership abilities.
- Highly analytical mindset, with an ability to see both the big picture and the details.
- Strong communication and presentation skills.
- Extensive knowledge of computer systems, operating systems, system security, database management, and web platforms.
- Above-average understanding of business operations.
- Awareness of and the ability to use a wide variety of software solutions.
- Project management and teamwork skills.
- Familiar with project management and agile approaches
- Familiar with Federal security standards and frameworks
- Experience with cloud technologies and platforms, such as AWS, Azure, or Google Cloud.
- Strong expertise in software architecture design and principles, with a focus on scalability, performance, and maintainability.
- Extensive knowledge of software design patterns, data modelling, and database design principles.
- Solid understanding of software development methodologies, including Agile and DevOps practices.
